INSPECTION REPORT

June 5, 1952

BESS OIL & GAS CO.

Re: Bess-Rock Bros. #1  
NESW Sec. 10-16N-35E  
Quay County

Drilling is progressing satisfactorily with 5" tools at a total depth of 2725'. A 15' water sand was encountered at 2685'. It was a clean, fine to medium grained reddish sandstone and made approximately 5 bailers of water per hour. The water has not risen in the hole however, to hinder drilling progress. Formation at the above total depth is a coarse to medium grained shaley sandstone.

A handwritten signature in cursive script, appearing to read "E. A. Chavez".

E. A. CHAVEZ,  
Geologist-District 4
