We propose to leave two strings of casing in the well: 7 $\frac{5}{8}$ " from surface to 313 and 4 $\frac{1}{2}$ " from surface to 1838. We propose to spot 25 sacks of cement at 1750 to form a cement plug and then fill the hole with mud to 950 where we will spot another 25 sacks of cement to form a second cement plug. We then proposed to transfer ownership of the well to the landowner so that he can use it as a water-well.
