Albuquerque, New Mexico

Re: \$5,000 One-Well Plugging
Bond, Willard L. Cacy,
SE NE, Section 23, Town-
ship 6 North, Range 5 East.

Dear Sir:

Reference is made to your letter dated July 8, 1959, where-
in you request cancellation of the above-captioned bond.

Our records indicate that a Notice of Intention to Plug this
well, has never been filed. Before this Commission can approve
cancellation of the bond, Mr. Cacy must file a Notice of Intention to
Plug (Form C-102), stating thereon the manner in which the well is to
be plugged. Once the well is plugged, the results of such plugging
must be reported on our Form C-103.

Upon approval of Form C-103 we will proceed with cancel-
lation of the bond.

Very truly yours,

I. R. TRUJILLO
Administrative Assistant

[illegible]

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 200 million to 400 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. Next, gather relevant information and data. This may involve research, consultation with experts, or collecting data from various sources.

3. Once the information is gathered, analyze it to identify patterns, trends, and potential solutions. This step often involves critical thinking and problem-solving skills.

4. After analysis, develop a plan or strategy to address the problem. This plan should outline the steps to be taken and the resources needed.

5. Implement the plan and monitor the progress. This involves putting the strategy into action and regularly checking the results to ensure the problem is being solved.

6. Finally, evaluate the outcome and reflect on the process. This step involves assessing the effectiveness of the solution and identifying any lessons learned for future reference.

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971).

...the fact that the *in vitro* and *in vivo* results are in good agreement, and that the *in vivo* results are in good agreement with the results obtained from the *in vitro* studies.

the 1990s, the number of people in the world who are undernourished has declined from 1.1 billion to 800 million. The number of people who are malnourished has declined from 1.5 billion to 1 billion. The number of people who are obese has increased from 100 million to 300 million. The number of people who are overweight has increased from 100 million to 300 million. The number of people who are obese and overweight has increased from 100 million to 300 million. The number of people who are obese and overweight has increased from 100 million to 300 million.
