The Oil Conservation Commission was established in 1975 by the New Mexico Legislature. Its primary purpose is to conserve the state's oil resources and to promote the efficient use of oil. The Commission is composed of representatives from the oil industry, the public, and government agencies.

The Commission's activities are directed towards the development and implementation of oil conservation programs. These programs include the promotion of energy conservation, the development of alternative energy sources, and the improvement of oil recovery techniques. The Commission also provides technical assistance and information to the public and industry.

Oil Conservation Commission

The Commission's annual report provides a detailed account of its activities and accomplishments. This report is available to the public and is an important source of information on the state's oil resources and conservation efforts.

The Commission's activities are supported by the state of New Mexico and the oil industry. The Commission's efforts are essential to the state's energy future.
