17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The above well is presently capped with an Orbit Valve. I want to complete this well as soon as I can iron out the financial status of the well. I want to acidize and swab test the zone from 1532 to 1582 feet before this well is permanently abandoned. I was down there the end of February and swabbed the well and it made some oil and gas. I went to Albuquerque to meet with the attorneys and bring some legal action against those who haven't paid up their bills. I feel that if I had a little more time, I would sure like to complete this as a well, as I have a lot of faith in it. The people who did pay their bills are looking to me to finish this well and I would sure appreciate it if I could have 6 more months on this well. We will place additional cement behind the 5 1/2" casing before additional testing is made to make certain that the water zone at approximately 300 feet is isolated from the zones being tested.

In the meantime, since we have corresponded, the state of Kansas has approved my Penneco Corp. and in just a little more time, if I am unsuccessful in legal action against those people, I could take and earmark some of the corporation money for development in New Mexico and would earmark it for the completion of this Burns lease, thereby taking those who didn't pay out of the deal as per my option in my contract with them. I enclose a prospectus of my approved corporation.

I would certainly appreciate your help in this difficult matter.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
