

OIL CONSERVATION COMMISSION

P. O. BOX 871
SANTA FE, NEW MEXICO

February 7, 1952

Mr. H. E. Seward
Richard L. Nunn & Company
Clayton, New Mexico

RE: Richard L. Nunn & Co., Jim Hopson No. 1,
NESW 26-23N-35E, Union County, N. M.

Dear Sir:

Please find enclosed your approved copy of form C-102 (Notice of Intention to Run Casing) on above captioned well.

We have your C-103 (Report on Setting Casing) on this well but your account of work done is not complete. Please submit this report again, indicating if the 8-inch string was cemented or landed; how much cement was used; and if you get a satisfactory water shut-off. The latter is of the most concern to us, as all potable water zones must be isolated to ward off future contamination by lower salt waters.

I assume that you have reduced the hole below the 8-inch casing. However, you may be underdigging with intentions to lower the 8-inch string. Please specify how you are proceeding.

Very truly yours,

E. A. CHAVEZ, Geologist

Mr. H. E. Gewart
Richard L. Mann & Company
Clayton, New Mexico

RE: Richard L. Mann & Co., Jim Hopson No. 1,
NEW 28-23N-35E, Union County, N. M.

Dear Sir:

Please find enclosed your approved copy of form
C-102 (Notice of intention to drill casing) on above captioned
well.

We have your C-102 (Report on Setting Casing) on
this well but your account of work done is not complete. Please
submit this report again, indicating if the 8-inch string was
cemented or landed; how much cement was used; and if you get
a satisfactory water shut-off. The latter is of the most con-
cern to us, as all potable water zones must be isolated to ward
off future contamination by lower salt waters.

I assume that you have reduced the hole below the
8-inch casing. However, you may be underdigging with intention
to lower the 8-inch string. Please specify how you are pro-
ceeding.

Very truly yours,

H. A. CHAVEN, Geologist
