In re: Gruemmer Indian Carbonic, Ltd.

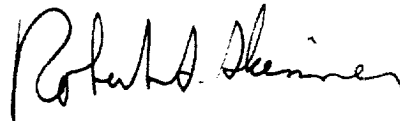

ATTENTION: Mr. Eugene A. Chavez
Oil and Gas Inspector

Gentlemen:

Enclosed please find form C-102 in triplicate in connection with a notice of recompleat on two wells owned by the above near Des Moines, New Mexico. Also please find form C-105, well record, for Gruemmer No. 1 well. I hope these forms appear in order. When the recompletion work is finished, we shall send you word.

In connection with Nelson-Moore Development Company, well No. 1 drilled several years ago, can you tell me whether the records in your office indicate the condition this well was left in. The reason for the recompletion work on that well was that the well was found to be clogged with drilling tools and rubble, the rubble being the result apparently of "bombing" the botton. In addition, approximately 1300 feet of 5 5/8" casing was pulled. We are curious to know whether this information was transmitted to your office.

Very truly yours,
