FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

In plugging back February 6, 1947 to 2822' and testing afterward, we find we failed to plug back enough to shut off the formation water at that depth. We now propose to plug back from 2822' to 2800' with approximately 25 ex. cement to completely shut off this water, using Halliburton service and 2 1/2" open-ended tubing.
