Oil Conservation Commission
P.O. Box 871
Santa Fe, New Mexico

Gentlemen:

Reference is made to the Ringle No. 1 and Ringle No. 3 Wells located in the NE/4 NW/4 of Section 34, Township 6 North, Range 4 East, NMPM, Valencia County, New Mexico, which the Commission, by letter dated February 25, ordered to be plugged within thirty (30) days of that date.

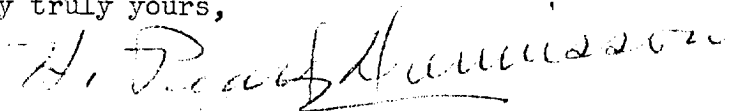

Please be informed that the undersigned, as the owner and the operator of Dennisson Contractors has negotiated an agreement with Mr. Cecil S. Ringle to pull the casing in the above-described well-holes and to plug the wells.

We have made a physical inspection of the well sites and found that due to moisture and weather conditions it would be extremely impracticable to move a rig onto the locations at this time.

Barring unforeseen weather conditions, it should be possible to move onto the wells and plug them by April 26.

It is respectfully requested that this additional thirty day extension of time be granted. Every effort will be made to perform the work in that time.

Very truly yours,

H. Pearl Dennisson
