RE: Linn * Turner A Battery (Turner A 51) * 30-015-28758 * 2RP-1015

Ms. Gladden,

Option One of this proposal is approved with the following exception:

Bottom hole confirmation samples (of TPH only) will be required in the area of SP5 and the area around the heater treater.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson
Environmental Specialist
NMOCD District II
