Re: RJU Unit #136
30-015-37139
Sec. 27, T17S-R29E
Eddy County, NM

Mrs. Heather Patterson,

COG Operating LLC would like to submit the enclosed documents for closure of the RJU Unit #136 release reported on the C-141 Initial dated July 8, 2014.

All work has been completed in accordance with the approved work plan submitted to the NMOCD and BLM, along with the requested stipulations. As per the NMOCD stipulations, S1 was excavated down to a depth of 10'. During a verbal discussion with the NMOCD it was agreed that COG would not blend and aerate the zone from 10' to 14' in order to decrease the amount of impact to the natural surroundings. The sample in question for the S1- 14' zone was determined to have been cross contaminated and a confirmation sample was to be attempted. Due to sloughing during excavation, a representative sample could not be achieved. The areas of S2 and S4 were excavated as written with S3 excavated to a depth of 3' and a liner installed prior to backfill. The excavated areas were backfilled with caliche and 2' of clean topsoil.

A signed C-141 Final is enclosed for your consideration. Please feel free to contact me with any questions or concerns at (575) 748-6933.

Sincerely,

Lupe Carrasco
Environmental Coordinator

Enclosed: C-141 Final

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
3" steel line corroded due to age, the will be replaced with poly.

Describe Area Affected and Cleanup Action Taken.*
Initially 10 bbls of oil and 40 bbls of produced water were released. We were able to recover 8 bbls of oil and 15 bbls of produced water with a vacuum truck. All free fluids have been recovered. Concho will have the spill site sampled to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD/BLM for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
