RE: BopCo \* BEU-158 \* 30-015-35345 \* 2RP-2631, 2RP-2662

Tony,

Your remediation plan for the above site is approved as written.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson  
Environmental Specialist  
NMOCD District II  
(575)748-1283 ext.101

**Subject:** BEU-158

Mike, Heather, Please find the attached remediation plan for the BEU-158 (API 30-015-35345)  
We had two spills, one on 11/24/14 (2RP-2631) and one on 12/1/14 (2RP-2662)

Due to the release of condensate and the estimated depth of ground water at 50 to 75 ft. BGS;  
BOPCO elected to use an air rotary rig to determine the saturation depth and hydrocarbon  
concentrations.

Our plan will be to clean up the area once the tanks have been relocated.

Our estimated start date is pending on operations scheduling.

Regards

Tony
