---

This is to give notice that we will be starting the remediation activities on the above referenced release. Per NMOCD stipulations, we will be backfilling the open excavation at sample point S-1 with the contaminated material so that we can drill a boring to further delineate this site. A caliche road will then be built along the west side of the pipeline right away and pad to get the drill rig to the release point. We will have to cross the active fiberglass line.

Respectfully,

***Kimberly M. Wilson***
