RE: Oxy * Righthand Canyon 34 Fed * 30-015-32807 * **2RP-2790**

Ms. Neeld,

You may proceed with work on this site with the following stipulations:

- A proper site map with the excavation outline must be presented to the OCD;
- Excavation depths and confirmation samples must be approved by the OCD before this site is backfilled;
- Like approval by BLM is required for federal sites

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson
Environmental Specialist
