Remediation Capability Statement.pdf

I have a correction to make. There is a leach/extraction action also taking place in using this technique in which waste water will be removed from location.

Subject: Remediation idea for BOPCO South Loop 10" Mainline Leak (playa)

Hello All,

I am speaking with a representative from Terran Corporation about this desalinization technique as a remediation for the playa area in our Poker Lake Unit. Please review the brief data and let me know if this is something you would be willing to allow us to try in this case. They have had some success with this and they believe our site may be a good candidate for a pilot in this area. It would allow for chloride remediation without excavation or leaching. I will call next week to discuss the possibilities.

Thank you!

Amy C. Ruth
