RE: Oxy * Winston Gas SWD #4 * 30-015-30337 * 2RP-2870

David,

Your proposed work plan for the above listed site is approved with the following stipulations:

- Provide confirmation samples with your closure report at all three sample points.
- Notify the OCD 48 hours prior to excavation.

Please be advised that if significant contamination is left in place at time of closure, the OCD may opt to defer closing out this incident until site abandonment.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me or Mike Bratcher.

Heather Patterson
