RE: Cimarex * Parkway State Com #4 * 30-015-37504 * 2RP-2480

Sheldon,

Thank you for the revision. This work plan is approved as written.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather,

We have completed the further vertical delineation that you requested. I have made the appropriate changes to the work plan (attached). Please let me know if you have any questions or concerns.

Thank you.

Respectfully,

Sheldon L. Hitchcock

Sheldon,

Before this work plan can be approved the OCD requires the areas of S1 and S2 be further delineated. S1 needs to be further analyzed for BTEX and TPH, and S2 will need a vertical chloride delineation.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike,

Please review the attached work plan for the Parkway St. #4H. Most of the fluid remained on location with the exception of a small flow path off of the east side of the location. There is also a light overspray on the vegetation to the east-southeast of the location. A Micro-Blaze application (as referenced in the work plan) should remediate the overspray fairly quickly. Please let me know if you have any questions or concerns. Thank you.

Respectfully,

Sheldon L. Hitchcock
