The system was repaired Describe Area Affected and Cleanup Action Taken.* The spill impacted approximately 2,550 sq. ft. of pasture land that had been recently disturbed during a pipeline construction job. The release also misted approximately 4,760 sq. ft. of pasture area. All of the free standing fluid was recovered; the stained area was left as is pending remediation. The release area was remediated in conjunction with two other releases; 2RP-2630 and 2RP-2781. A portion of contaminated soil was excavated and hauled to a state approved disposal facility with remaining contaminated soil remediated on site. Based on laboratory analytical data and NMOCD approval the excavation has been backfilled with remediated soil. The area has been remediated in accordance to the NMOCD and BLM guidelines for spill remediation. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
