---

Good Morning,

I have revised the work plan on the above location in that, we will retrieve soil samples of the excavated area to confirm that chlorides are below 1000 mg/kg and the TPH levels < 5000 ppm. For your convenience I have included the site map of the spill area with the sample point positions. Please let me know if you have any questions. Heather, would you please send me an email if you concur?

*Thank You*

*Rebecca Pons*
