Gentleman,

Sorry for the late notifications, Tetra Tech will be onsite tomorrow (5-29-13) to start the assessment on the above referenced spill sites located in Eddy County, New Mexico. The spill assessments should take a couple of days to complete. Soil samples will be collected with a hand auger to define the spill extents. If the impacted areas are defined, work plan will be prepared for your review and approval. If you have any questions please call me, thanks
