---

I have reviewed this material for BLM.

My only comment regards Section I.A. (page 2 of 3) of the narrative "Response/Remediation Plan." It seems premature to proceed with site restoration - particularly reseeding - before knowing whether further excavation will be required.

But with that noted, BLM approved this proposed work to further delineate vertically the extent of contamination.

Hi Mr. Pair,

Attached is the 1009 Line Leak Response plan, including C-141 form for event and current analytical results. If you need additional information, please let us know.

Thank you,

Osman De Leon
