RE: COG * Owl 20504 JV-P #005 * 30-015-35435 * 2RP-3104

Lupe,

The OCD is in receipt of your proposed work plan/closure report for the above listed site. This closure request is denied for the following reasons:

- According to OSE website (see attached), the ChevronTexaco Trend map, and a previous COG remediation of the same site (2RP-1599), the depth to groundwater is less than 50 feet and possibly less than 25 feet. Therefore your site ranking of zero is not acceptable;
- The OCD will require further chloride delineation at S1, with a target goal of 250mg/kg;
- The depth of the initial scrape is unclear, as well as what contamination remains between the surface and your 1 foot sample.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Subject: (Notification) Owl 20504 JV-P #5 (30-015-35435)

Mr. Bratcher,

COG Operating LLC is reporting a release on the Owl 20504 JV-P #5 (30-015-35435)
Unit J Section 18, Township 26S Range 27E
The release occurred at 11:00 am on 6/24/2015
Released: 100 bbls oil; 510 bbls PW
Recovered: 90 bbls oil; 500 bbls PW

The release was caused by a tank overflow and remained within the lined containment. The area is being evaluated and a C-141 will be submitted. If you have any additional questions please feel free to contact me.

Thank you,

Amanda Trujillo
