Ms. Mendez,

This C-141 spill report will be accepted as an **Initial Report** only. OCD will require a delineation of the site and a remediation proposal presented to OCD based on analytical data, site ranking and OCD rules and guidelines. OCD has reason to believe that groundwater may be encountered at less than 100' (50' – 100' per Chevron Texaco Trend map) in this area.

If you have any questions or concerns, please contact me.
