---

Mike, Heather

Please find the attached Final C-141 and Remediation Summary and Site Closure Request. API 30-015-42479

Had a lot of problems getting all the data, Basin had a personnel change right at the end of the project.

The photos taken during and after the remediation have not been found.

I took some photos yesterday and added them to the report on the same page as the initial shots.

Also I corrected the initial C-141 on the date of spill, I had it reported in 2016.

When I tried to send the original report it notified me that the file was too large.

I will split out the lab data and send on a separate report.

Thanks

Tony
