RE: BopCo * Big Eddy Unit DI-4 * 30-015-42479 * 2RP-2757

Tony,

This closure request is approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, please contact me.

Heather Patterson
Environmental Specialist
NMOCD District II

Mike, Heather

Please find the attached Final C-141 and Remediation Summary and Site Closure Request. API 30-015-42479

Had a lot of problems getting all the data, Basin had a personnel change right at the end of the project.

The photos taken during and after the remediation have not been found.

I took some photos yesterday and added them to the report on the same page as the initial shots.

Also I corrected the initial C-141 on the date of spill, I had it reported in 2016.

When I tried to send the original report it notified me that the file was too large.

I will split out the lab data and send on a separate report.

Thanks

Tony
