RE: Pyote Well Service * Rohmer #1 SWD * 30-015-25722 * 2RP-1916

Audra,

Here is where it seems that we stand on the Rohmer #1 SWD:

The private land adjacent to the battery has been delineated and remediated according to an OCD approved plan.

The impacted soils on the SWD have yet to be delineated and remediated.

The OCD will require a full delineation of the impacted soils on the SWD property. Once this delineation has been completed, we will be able to determine the remediation requirements.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson
Environmental Specialist

Importance: High

Here is where the leak went over the berm. Due to power head switch di not kick in. Computer did not kick in. Froze the system. We how ever built a higher berm.
