Subject: Re: REVISED Gissler A 2 Battery Release C-141 Initial & Final | API #30-2015-33496
Date: Monday, October 19, 2015 10:50:03 AM

Upon review BLM accepts/approves your initial/final C-141 with no stipulations:

The BLM approval/acceptance does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

Please disregard the first copy of the C-141 and replace it with this copy. I had the incorrect discovery date on the report.

Thank you

Shelly/Heather,

Attached you will find the Initial/Final C-141 for the spill at the Gissler A 2 tank battery. The spill was contained within the lined confinement and has been cleaned up so I combined the Initial and Final Report into one document. If you need me to break this into two separate forms, just let me know and I'd be happy to do that.

Please let us know if you have any questions or need any additional information.

Thank you
