2011 6-29 De La Sierra Trucking, LLC C-133 approval.pdf

Ms. Olivia Estrada and Mr. Jesus Estrada,

The OCD conducted an onsite inspection of the De La Sierra Trucking site located at 1322 Hopi Rd, Carlsbad NM, 88220 on August 28, 2015. Upon this inspection it was discovered that De La Sierra Trucking was using produced water and produced water/oil mix to compact the caliche on this site. It is evident that multiple truckloads have been dumped, impacting approximately 20 acres. This is in direct violation of OCD environmental regulations and constitutes a hazard to fresh water, public health, and the environment.

First, De La Sierra Trucking must immediately cease the practice of illegally dumping oilfield waste on their site. A form C-141 must then be filled out and turned into either myself or Mike Bratcher at the Artesia OCD office (address listed below). De La Sierra Trucking will be required to remediate the entire site to OCD standards, including a full delineation to assess the environmental impact.

If you have any questions or concerns, please contact me,
