RE: Burnett * Gissler B 3-3 Tank Battery * 30-015-25221 * 2RP-2763

Leslie,

Your closure request has been approved. The remaining clean up at this site will be deferred until site abandonment.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns please contact me,

Heather Patterson

Leslie,

It's clear from the email chain below that you sent me this closure in May, but I can't find it anywhere in my email. Can you please resend it, and I'll get it processed as soon as possible.

Thanks, and sorry for the mix up!

Jim/Heather/Mike

Attached you will find the Closure Report and Final C-141 for the Gissler B 3-3 Battery. It is my understanding that there is some additional work that will be performed on this location at some point in the future during reclamation of the site.

Please feel free to contact me if you have any questions or need any further information.

Heather/Jim

We had Diversified take a composite sample of the areas of SP-2 & SP-3, and ran the PID. The reading that we got back was 69.4, which is below the acceptable level (100). We have removed approximately 2' in the areas of SP-2, SP-3, and some of SP-5. The liner is in the process of being installed, and the pad will be rebuilt. The area is to be expanded to approximately 150' x75' south of where the berms divided the tanks and the heater treaters. The areas of SP-1, SP-5, & SP-6 will be addressed once the location has been put back into service. After the location has been put back into service, we can meet on location to discuss the best way to proceed with the remaining areas to be remediated. If there is anything else that you need or that we can do for you, let us know. Thanks
