**Subject:** Re: FW: 20200 line leak

Most of the area surrounding this Lat-Long has been surveyed for archeology. However, about 70-ft to the NE (azimuth 45-degrees) is an area that has not been surveyed. If your spill might extend more than 70-ft to the NE, please send me a site diagram. I will need to review archeology before I can approve this remediation plan. Otherwise, I approve this proposal. Contact me with confirmation lab results prior to backfilling.

Mr. Pair and Mr. Dade

Please see the attached action plan for remediation and repair of the 20200 Line leak off Red Rd in Eddy County.
