The majority of the standing fluid was contained in the bermed area around the flare.

The area was GPS mapped, and based on a recommendation from BLM, the vegetation was washed with Dawn dish soap. The vegetation at the site will monitored over time to confirm that it has remained at normal vegetative capacity

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
