RE: Mewbourne \* Tamano 10 Fed Com #7H \* 30-015-39685 \* 2RP-3142

Zack,

Sorry about the delay in my response on this one.

The OCD is concerned about the high TPH and BTEX values and would like to see further hydrocarbon delineation at this location. A single borehole location should suffice for vertical extent. As for your remediation plans, we would prefer a 4 foot excavation, but do not see the necessity for a liner, as chloride impact seems to be minimal. Like approval by BLM is required for this site.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
