RE: Nadel And Gussman * Aid State #10 * 30-015-38462 * 2RP-3185

Cheryl,

Your backfill request is approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Subject: Aide State No. 10 Laboratory Analyticals

Good Morning, Heather and Amber!

Attached are the post excavation, laboratory analytical results from Nadel & Gussman's heater treater discharge at the Aide State No. 10 location. A total of (X Don't have yet.) yards of contaminated material was excavated from the site and hauled to R360/CRI disposal facility. The disturbed site will be remediated to commensurate topographic relief in the disturbed areas. Due to significant and constant variations in local topography, remediation efforts will satisfy only gradient concerns.

Nadel & Gussman hereby requests authorization to backfill the area and commence with final remediation. The area shall be seeded with BLM Seed Mix No. 2.

Additionally, a few photos are attached for your files.

Thank you,

Cheryl (432-425-7386)
