I will be sure and let you know when they can get that done. I told our production manager to stay on top of it so we can get it taken care of ASAP.

Good Morning, Heather! I am submitting an amended C-141 for the Rustler Bluff #1 in Eddy County. We have located the tanks. When the river subsided a little we found the 300 barrel water tank still on location – it had just been completely underwater. We have located the two 500 barrel oil tanks downstream – thanks to your photo. Unfortunately, they are on the opposite side of the river and it will be a few weeks until it is dry enough to retrieve them. We are staying on top of the situation and will let you know when we have the ability to get in.

Thank you Jana. We will get this entered soon. Let me know what you find when you are able to get into the site. I believe most of the roads are still closed, so we understand that it might be a while.

Hello, Heather. I have attached a copy of my C-141 and am also going to fed-ex the original. Please let me know what else we need to do. I passed along the photo and coordinates of the tank. I told them our luck did not hold – the tank appeared to be on the opposite side of the river than the road.....fun times!

Hello, Heather! Received your message. Please email me the photo and coordinates for found tank. We actually lost three but one was a fiberglass water tank and it may not have survived the river trip...I have attached a photo of our location taken Monday before the tanks were lost on Tuesday.
