RE: COG * Myox 32 Fee #2H * 30-015-41521 * 2RP-3274

Lucas,

Unfortunately the OCD cannot accept your closure request at this time as a vertical delineation has not been established. Please obtain further vertical samples with a chloride delineation goal of 250mg/kg. The excavation, cap, and backfill are acceptable, and once the delineation is completed, this closure request can be approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
