Subject: RE: Proposed work plan for Cimarex Cottonwood Draw 22 Fed 2H

RE: Cimarex * Cottonwood Draw 22 Fed 2H * 30-015-36757
2RP-3136 * Date of release: 7/6/2015

Lance,

Your proposal for remediation of the above referenced release is approved with the following conditions of approval:

- Remove 1' of material across the well pad.
- After the proposed 4' removal in the area off of the well pad, obtain a representative sample from the area identified as SP6. This sample is to be lab tested for TPH, BTEX and Chloride content. Provide OCD with this data prior to backfilling this area.
- Notify the District 2 office once remediation activities have been scheduled.
- Like approval by BLM.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike Bratcher
NMOCD District 2
