RE: Devon * Ore Ida 14 Fed 10 SWD * 30-015-29290 * 2RP-3374

Vernon,

The OCD is in receipt of your work plan for the above referenced release. This work plan is approved with the following conditions:

* From RP1 through SP5 your proposal to remove 4' of soil and place a liner is approved. It is OCD's understanding that this excavation will include the flow path between SP1 and SP4, but exclude SP2 and SP3.

* The OCD would like bottom hole lab verification samples for chlorides at SP1, SP4 and SP5, and for chlorides, BTEX, and TPH at RP1.

* Your proposal for 4' excavation with confirmation samples from SP5 through SP9 is approved. Please be sure confirmation samples are lab verified (excluding SP8).

* Like approval by BLM is required for Federal sites.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Good morning Heather,

Please see the attached remediation work plan. I've got a crew that can get on this one pretty quick with your approval.

Thanks,

Vernon K. Black
