RE: Yates Petroleum * Bryan ME #1 * 30-015-23097 * 2RP-3164

Amber,

Thank you for the vertical delineation at this location. Your work plan is approved with a few exceptions. For liner protection, the OCD would like a four foot excavation. Also, as it appears you may have discovered some historic contamination, the OCD requests sidewall confirmation samples at time of closure. These samples should display chloride levels at 800 mg/kg or less, and may be done with field screens if Yates prefers.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather/Mike,

Please find attached a work plan for the release that occurred at the Bryan ME #1 on July 11, 2015 (2RP-3164).

Should you have any questions or comments, please let me know.

Thank you,

Amber Griffin
