Hi Shelly, we are still in progress with this project. The release was entirely inside the berm and Devon policy does not allow any mechanized equipment inside berms so we are Hand digging and it kind of slow. We will finish this week though. Thank you for your inquiry.

RE: Devon * Todd 24-B Battery 2 * 30-015-27691 * 2RP-3051 * 2RP-1686 * 2RP-1391

Rebecca,

This work plan is approved as written. Be advised that despite a liner being placed within the battery firewall, this will not be considered a lined facility by the OCD. Like approval by BLM is required for this site.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Subject: Work Plan

Good Afternoon Heather,

I have attached a plan of remediation for the above site. The spill area for this site was retained inside the bermed area for the tank battery. Due to the number of lines etc., we are proposing to conduct a 1' bgs excavation, line and backfill. The liner would prevent any further migration of chlorides. Please review and advise if you concur.

Thank You

Rebecca Pons
