NATURE OF RELEASE

Type of Release Produced Water Release	Volume of Release 1304bbbls	Volume Recovered 1303bbbls
Source of Release Hole in lined containment	Date and Hour of Occurrence June 9, 2014 @ 10:29 AM	Date and Hour of Discovery June 9, 2014 @ 10:29 AM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Jim Amos, BLM Thomas Oberding, OCD	
By Whom? Lynn Smith, Asst. Production Foreman	Date and Hour June 10, 2014 @ 10:00 AM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse N/A	

If a Watercourse was Impacted, Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.*

A pin hole in the lined containment formed causing the spill that escaped containment. After the produced water was recovered it was discovered that the 6" fiberglass fill line had come apart at a tee on the bottom section causing the spill into the lined containment. Containment will be repaired. Braces will be built on fill line. Spill occurred on the side of the pad affecting approximately 28' x 160'.

Describe Area Affected and Cleanup Action Taken.*

Equipment will be steam cleaned and affected soil will be removed and replaced with fresh soil.

Soil samples at 9' and 11' below ground surface were field tested and sent to Cardinal Laboratories for testing. Both sets of results indicated levels below closure limits. Remediation was conducted according to the NM OCD and BLM approved work plan. An impacted area of 15' x 20' was excavated to a depth of three feet below ground surface. The excavation was then lined with a 20 mil synthetic liner and backfilled with fresh soil. The area was brought to grade and contoured to match the surrounding terrain.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
