RE: Final Closure Report
Bopco, L.P. – PLU #232
UL-D, Section 31, Township 24 South, Range 30 East
Eddy County, New Mexico
NMOCD Reference #'s 2RP 3463

Ms. Patterson:

The following *Final Closure Report* serves as a condensed update on closure activities for the above referenced Site.

Background Information:

BOPCO EHS was notified of a release that occurred when the packing in the stuffing box failed causing oil and produced water to be released to the well pad. A vacuum truck was called to the location; by the time the vacuum truck arrived the fluid had already soaked into the soil. A backhoe was used to remove the heavy saturated material from the well pad.

Remediation Activities:

EPI personnel mobilized on the site on April 18, 2016 to collect soil samples to determine the vertical extent of contamination. A total of five (5) soil samples were collected from three (3) sample locations; SP1 – SP3. Three (3) representative samples were sent to Cardinal Labs in Hobbs, New Mexico, for testing. Laboratory analytical results indicate the release area to be void of Benzene, BTEX, TPH, and Chloride concentrations in excess of NMOCD Recommended Remedial Action Levels (RRALs) of 10 mg/Kg, 50 mg/Kg, 5,000 mg/Kg, and 1,000 mg/Kg, respectively (reference *Figure 3* and *Table 2*).

After an initial surface scrape of the release area, the NMOCD approved no further action at the areas around SP1 and SP2 while the area around SP3 was further excavated to a depth of approximately twelve (12) inches bgs. Approximately 36 tons of contaminated soil was excavated and hauled to a state approved facility for disposal.

Closure Activities:

Based on laboratory analytical data and NMOCD approval, the excavation was backfilled with approximately 36 tons of clean soil. The entire disturbed area was then contoured to blend with existing pad area and protected against wind/water erosion.

Should you have any questions or concerns please feel free to contact me at (575) 394-3481 or via e-mail at ddominguezepi@gmail.com or Mr. Brad Blevins at (432) 214-3704 or via e-mail at bblevins@basspet.com. All official communication should be addressed to:

Mr. Brad Blevins
Bopco, L.P.

RE: PLU #232

Enclosed are the results of analyses for samples received by the laboratory on 04/19/16 15:28.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-15-7. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive, flowing style.

Celey D. Keene

RECEIVED

If a Watercourse was Impacted, Describe Fully.*	
Describe Cause of Problem and Remedial Action Taken.*	
BOPCO EHS was notified of a release that occurred when the packing in the stuffing box failed causing oil and produced water to be released to the well pad.	
Describe Area Affected and Cleanup Action Taken.*	
A vacuum truck was called to the location; by the time the vacuum truck arrived the fluid had already soaked into the soil. A backhoe was used to remove the heavy saturated material from the well pad; the material was hauled to Lea Land for disposal. Samples were collected from the release area and will be discussed with OCD.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

NATURE OF RELEASE

Type of Release: crude oil, produced water	Volume of Release: 3 bbls oil, 4 bbls pw	Volume Recovered: none
Source of Release: stuffing box	Date and Hour of Occurrence: 12/17/15 @ 8 am	Date and Hour of Discovery: 12/17/15 @ 8:30 am
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour:	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse: Not Applicable	

If a Watercourse was Impacted, Describe Fully.* Not Applicable

Describe Cause of Problem and Remedial Action Taken.*

BOPCO EHS was notified of a release that occurred when the packing in the stuffing box failed causing oil and produced water to be released to the well pad.

Describe Area Affected and Cleanup Action Taken.*

A vacuum truck was called to the location; by the time the vacuum truck arrived the fluid had already soaked into the soil. A backhoe was used to remove the heavy saturated material from the well pad. Contaminated soil was excavated and hauled to a state approved disposal facility and samples were collected. Based on laboratory analytical data and NMOCD approval the excavation has been backfilled with clean soil.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
