Ok, that works. I should be able to close all three, but I need two things from you.
A revised C-141 for 2RP-3502 that removes the shredding part
A Final C-141 for 2RP-2959

Thanks,

Heather Patterson

Heather,

You are correct that the shredding was for 2RP-3272 and 2RP-2959. However, the reason that all spills are referenced in this closure is because when the third spill occurred, the We sampled the soil that week to prove that chloride levels had not been impacted and that we had recovered all of the spill with the snow melt. The PW spill went over the area where the oil spill was, which is why samples were taken to verify that that the spill had not impacted the soil.

Thanks,

Brett Fulks

According to my records, the soil shredding was to include 2RP-3272 (9/14/2015) and 2RP-2959 (4/14/2015). Both of which were predominately oil spills. I understand tacking on and closing the 1/8/2016 (2RP-3502) spill, since it was cleaned up while the ground was frozen, but the Final C-141 says the soil was shredded. Was the soil from the PW spill also shredded? If not, how was it remediated?

Also, I need a final C-141 for 2RP-2959.

Subject: Hackberry 18 Federal 1- Release on 9-14-2015 & 1-8-2016

Good morning,

Please find attached the Final C-141's for the Hackberry 18 Federal 1 release on 9/14/2015 of 400 BBLS Oil & 70 BBLS produced water and the release on 1/08/2016 of 132 BBLS produced water at the same location. The Closure report from Talon LPE and the results of the soil analysis from Cardinal Laboratories are attached.

Please contact me with any questions you may have.

Thank you very much!

Respectfully,

Sarah Gallegos-Troublefield
