Vernon,

BLM approves the proposed remediation plan. When preparing the MicroBlaze, please use fresh water rather than brine or brackish to ensure better effectiveness.

Please let me know when you expect to begin the work.

Thank you.

Dara

The BLM approval/acceptance does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Vernon,

Your proposed work plan is approved. Keep in mind that if RRAL for the site has not been achieved after 180 days, OCD will require impacted soils to be removed to a disposal.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Subject: Devon Bellatrix 28 Fed #1H Work Plan

Good morning Ladies,

Please see the attached work plan for the above referenced location. Upon approval, I can get a crew on it pretty quick.

Thanks in advance for your help.
