Subject: RE: Closure Documents, Winston Gas Com Battery (6-19-16)
Date: Friday, July 08, 2016 1:13:00 PM

RE: Oxy Permian * Winston Gas Com Battery * 30-015-28633 * 2RP-3770

Kathy,

Your closure request is approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson
Environmental Specialist
NMOCD District II
Office (575)748-1283 ext.101

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Attached are the closure documents for a leak that occurred at the Winston Gas Com Battery on 06/19/2016 in Eddy County, NM. Receipt notification via email is greatly appreciated. Also, this is a lined battery, so remediation was completed by removing affected material and replacing it with clean material.
