Describe Cause of Problem and Remedial Action Taken.\*

A ball valve in the back of the tank has a hole in it. A field supervisor found the leak at 11:48 am. He immediately plugged the valve and called a vacuum truck that recovered 5 bbls of free-standing fluids.

Describe Area Affected and Cleanup Action Taken.\*

The affected area is located inside the firewall on location. Sampling revealed that further remediation was not required/necessary. Therefore, it was determined that the best course of action was to simply close the event.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
