---

Good Morning, Brenda,

I was just hoping that I could get an update on this site, please?

Thank you,

**Amber Groves**

**Subject:** RE: C-141 for API 30-015-26095

Brenda,

That is just the C-141 again. What we need is a plan that includes soil samples that have been analyzed at the lab to show the full vertical and horizontal extent of the contamination at this location. Most operators hire environmental firms to do this. Here is a link to the NMOCD Guidelines for remediation:

[http://www.emnrd.state.nm.us/OCD/documents/7C\\_spill1.pdf](http://www.emnrd.state.nm.us/OCD/documents/7C_spill1.pdf)

thank you,

Heather Patterson

Brenda,

I cannot approve your C-141 as an initial and final report. During a follow-up inspection of the location, it was discovered that the contamination was still in place, just covered over with clean material. In addition, the valve was found to be still leaking. I will accept your C-141 for record and mark it as an initial only. The OCD will require this release be properly delineated, with that delineation used to form a work plan proposal, which should then be submitted to the OCD for approval.
