Ms. Martin, et al,
BLM also approves the revised remediation plan.
I did not get an answer as to which samples indicated >1000 ppm TPH; but I guess that can wait for the confirmation samples.

RE: Holly Energy Partners * Henshaw Station * fAB1629932334 * 2RP-3958

Tara,

Your proposed remediation is approved. Please note that based on your assessment of groundwater at 80 feet, this site should have a site ranking of 10. Like approval by BLM is required for this release.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson
