

Assault/Delaware River Event

Agency Report

August 10-14, 2017

Incidents:

None

Safety Meetings or JSA's:

XEC, NTG, Acme and Talon – Held pre-job safety meeting & Review JSA in the mornings.

Major Tasks and IMT Notes

Daily mobilization of OSRO's and equipment

- Booms – hard and absorbent
- Acme crew (5)
- Acme boat (2)
- XEC began daily check of booms on 8/12.

Conference call with Santa Fe agencies (NM Game & Fish, NMOCD and Deputy Secretary of Energy).

Field Work

- Conducted a joint agency field review on 8/10. Attended by BLM, USF&WS, MNOCD and EPA.
- EPA conducted a field review of Delaware from Site # 1 to Red Bluff reservoir.
- Continued boom maintenance operations.
- Checked and adjusted booms and upgraded absorbents on sites 3 and 3A.
- Changed the absorbent boom within the ravine/gully (east of the gathering line leak point. Note this was completed due to the soil build-up and not due to oil spillage or saturation).
- NTG and Talon completed water sampling per assignments.
