RE: Cimarex Energy * Glycerin 10 Fed Com 1 * 2RP-3407 * DOR: 11/11/2015

Christine,

Your proposal for remediation of the above referenced release is approved with the following:

Based on data presented, the area identified as S-1 was not vertically delineated for BTEX. Confirmation samples will be required to establish that definition, and may require deeper excavation than proposed. Confirmation samples will be required to be obtained in a manner that will show lateral definition as well. Federal sites will require like approval from BLM. Please advise once remedial activities have been scheduled.

Mike Bratcher
NMOCD District 2
811 South First Street
Artesia, NM 88210
575-748-1283 Ext 108

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
