Hello Aaron,

I took a look at the analytical data you provided. Thanks for sharing. Unfortunately we need a full work plan in order to be able to identify what you propose to do to remediate this site and what steps you propose to take to do it. Also we would need a site map describing where these samples were taken location wise and further more are those non-surface samples supposed to be at 1" or was that meant to say 1'? If it is 1" then it is 1" I was just making sure.

At any rate, we will look forward to hearing from you again. Also did you ever get an answer on whether or not this site was on State Land Office surface or not?

Thank you kindly,

## Crystal Weaver
